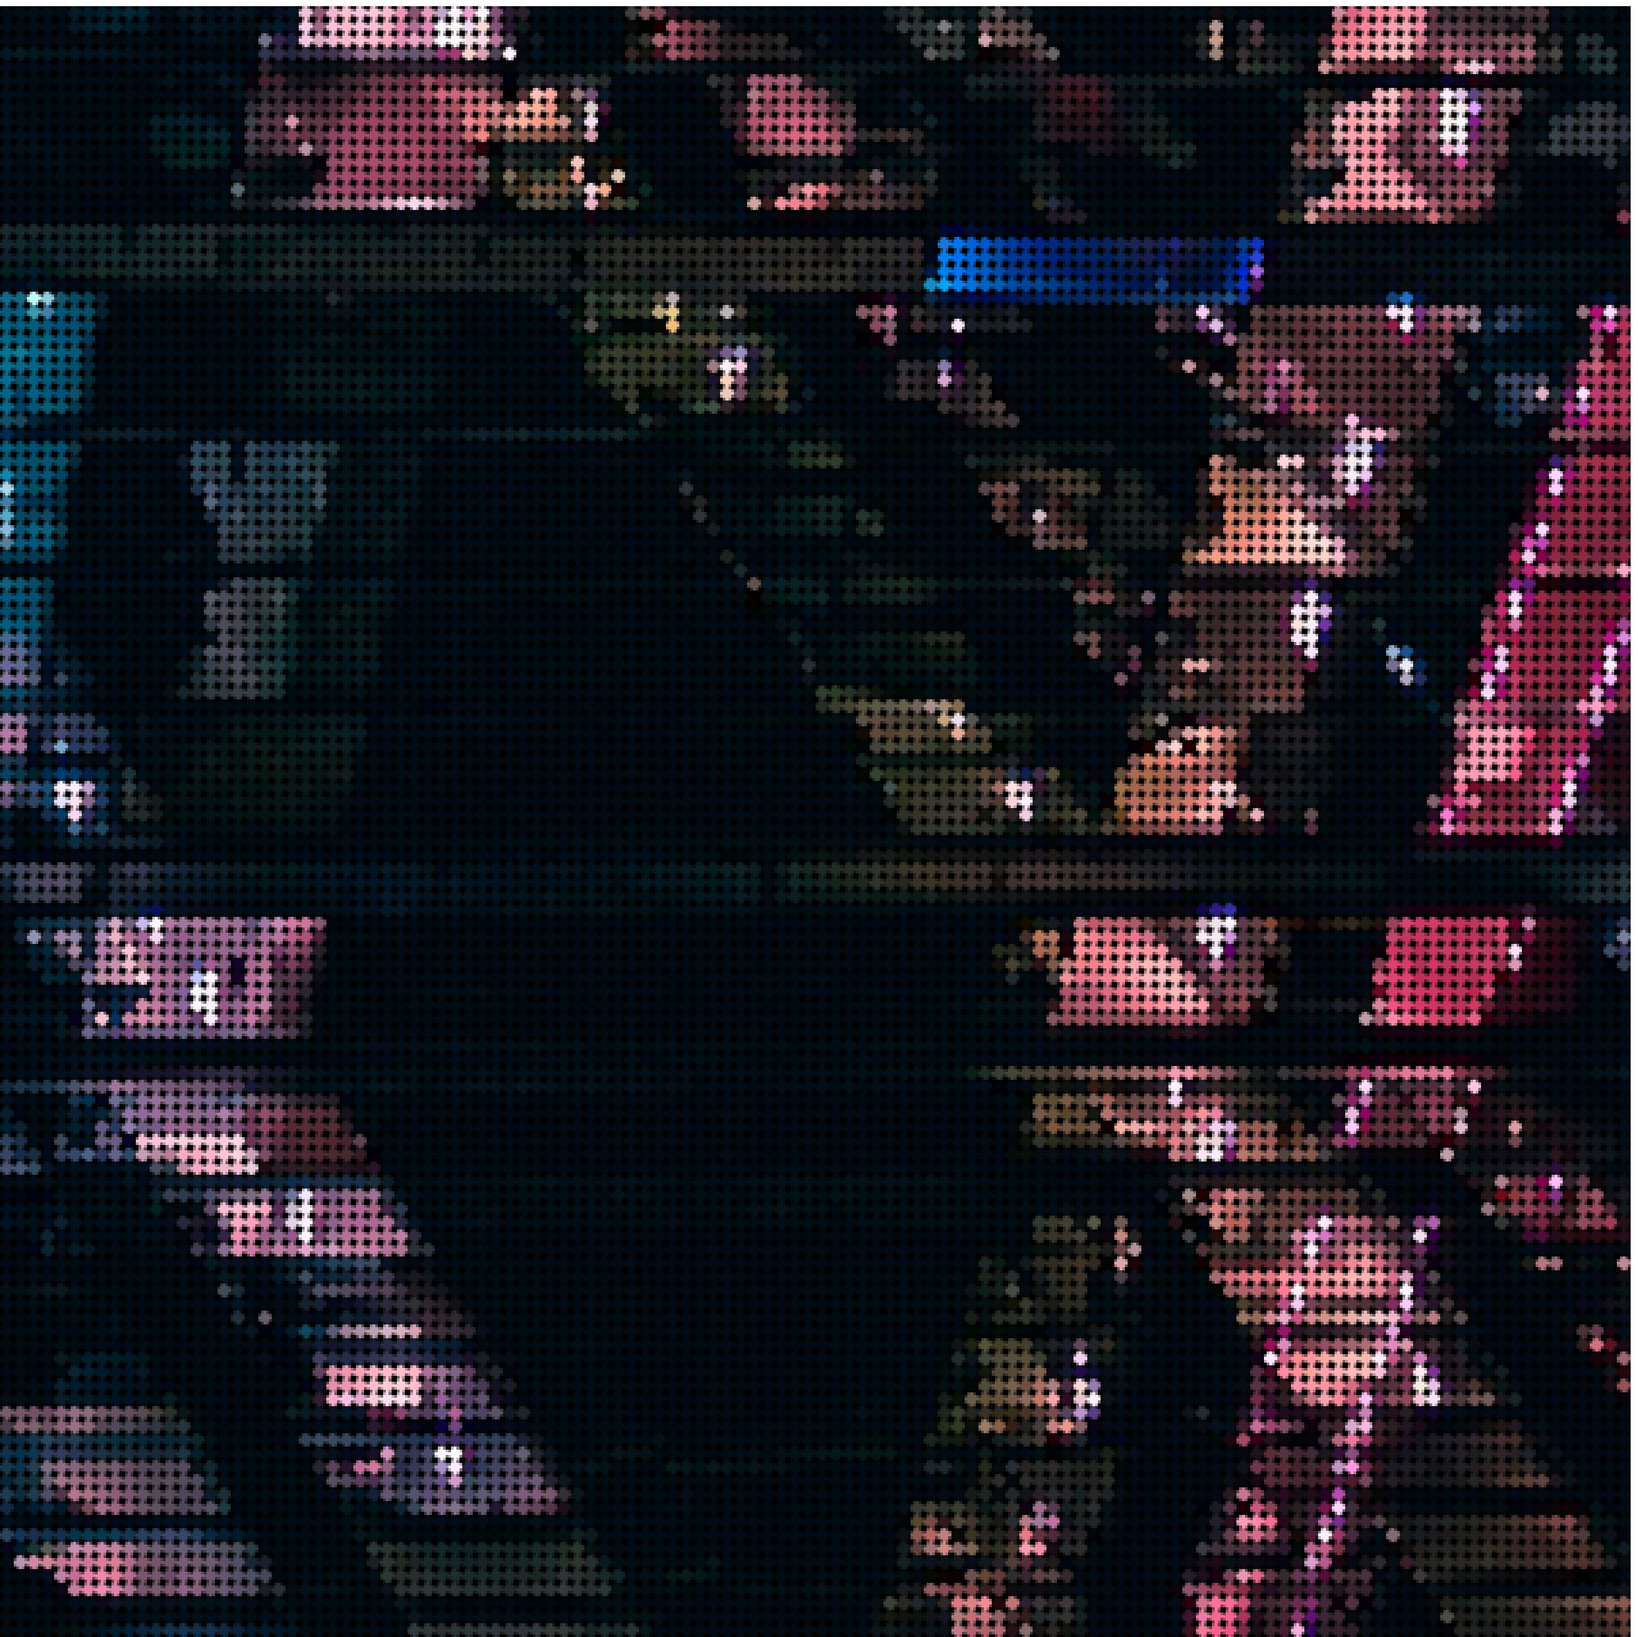
mosaic-β

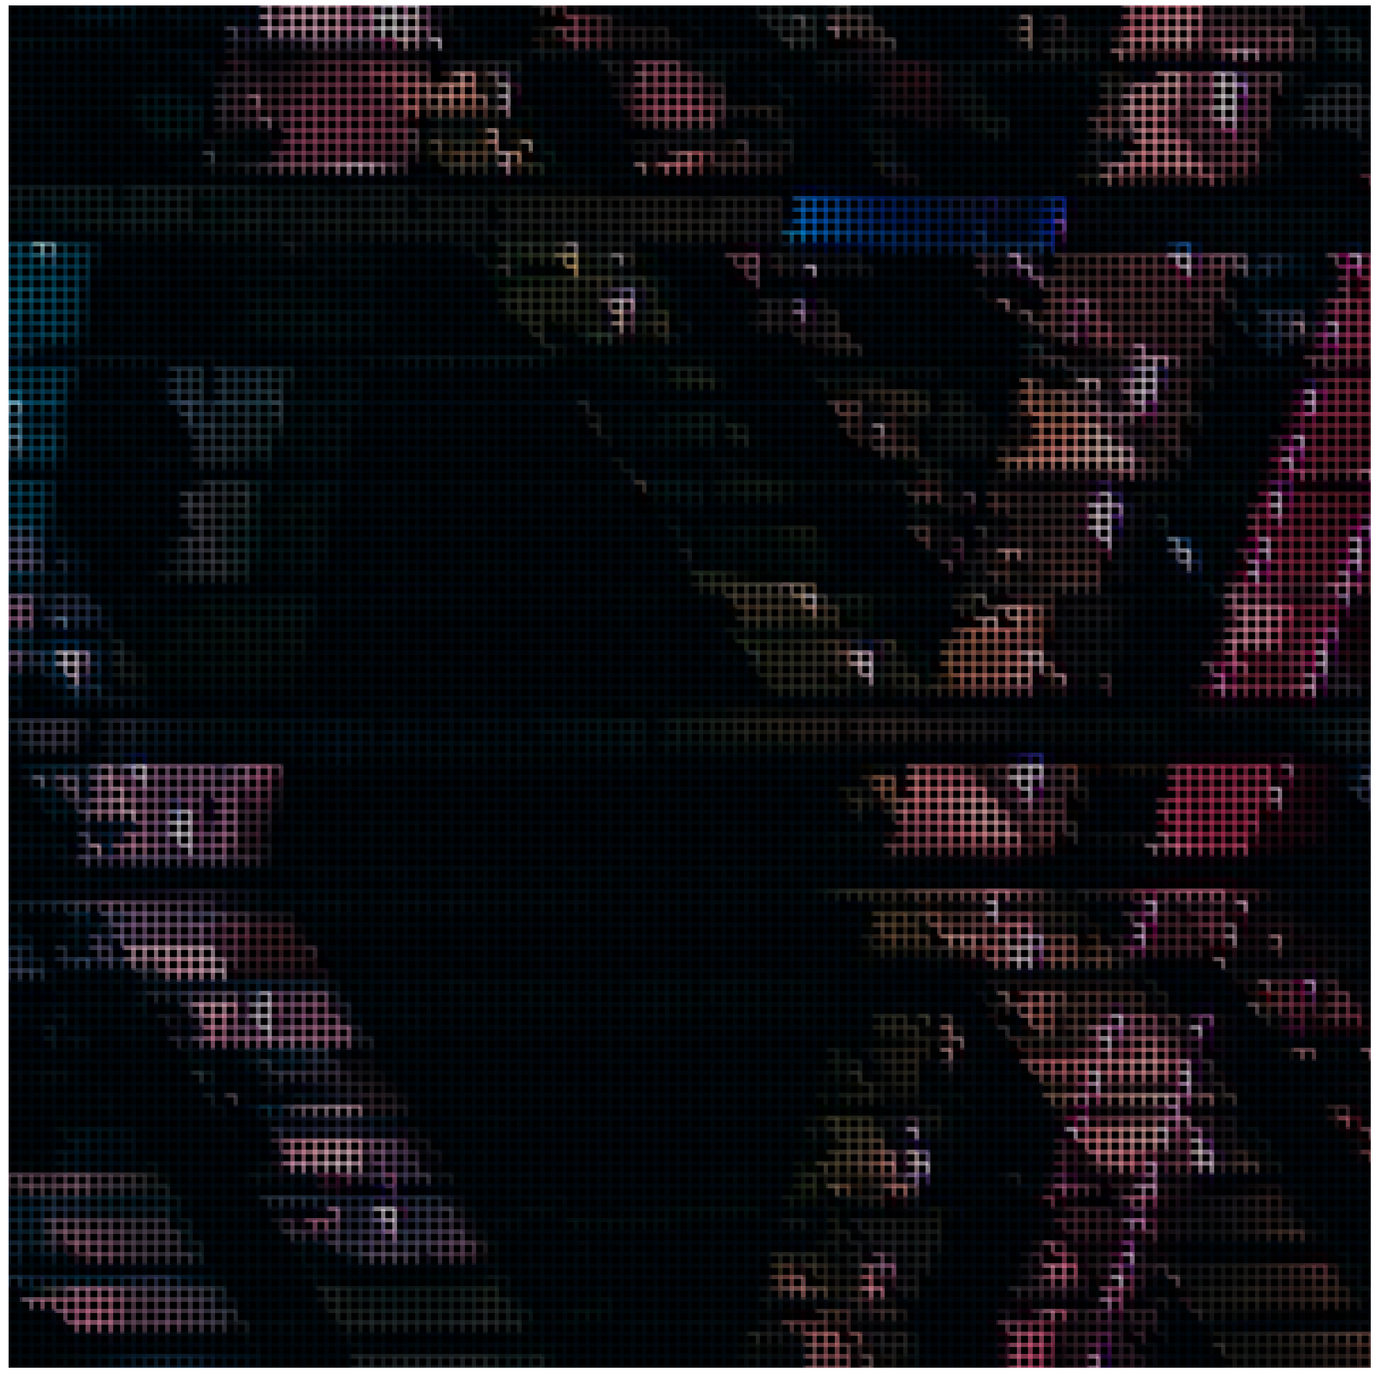
kimura koya

Mosaics are not meant to hide the evils of society, but for me to enjoy art.

I don't want to announce anything special, I just want to show the world how much I enjoy creative coding.

01. Shape

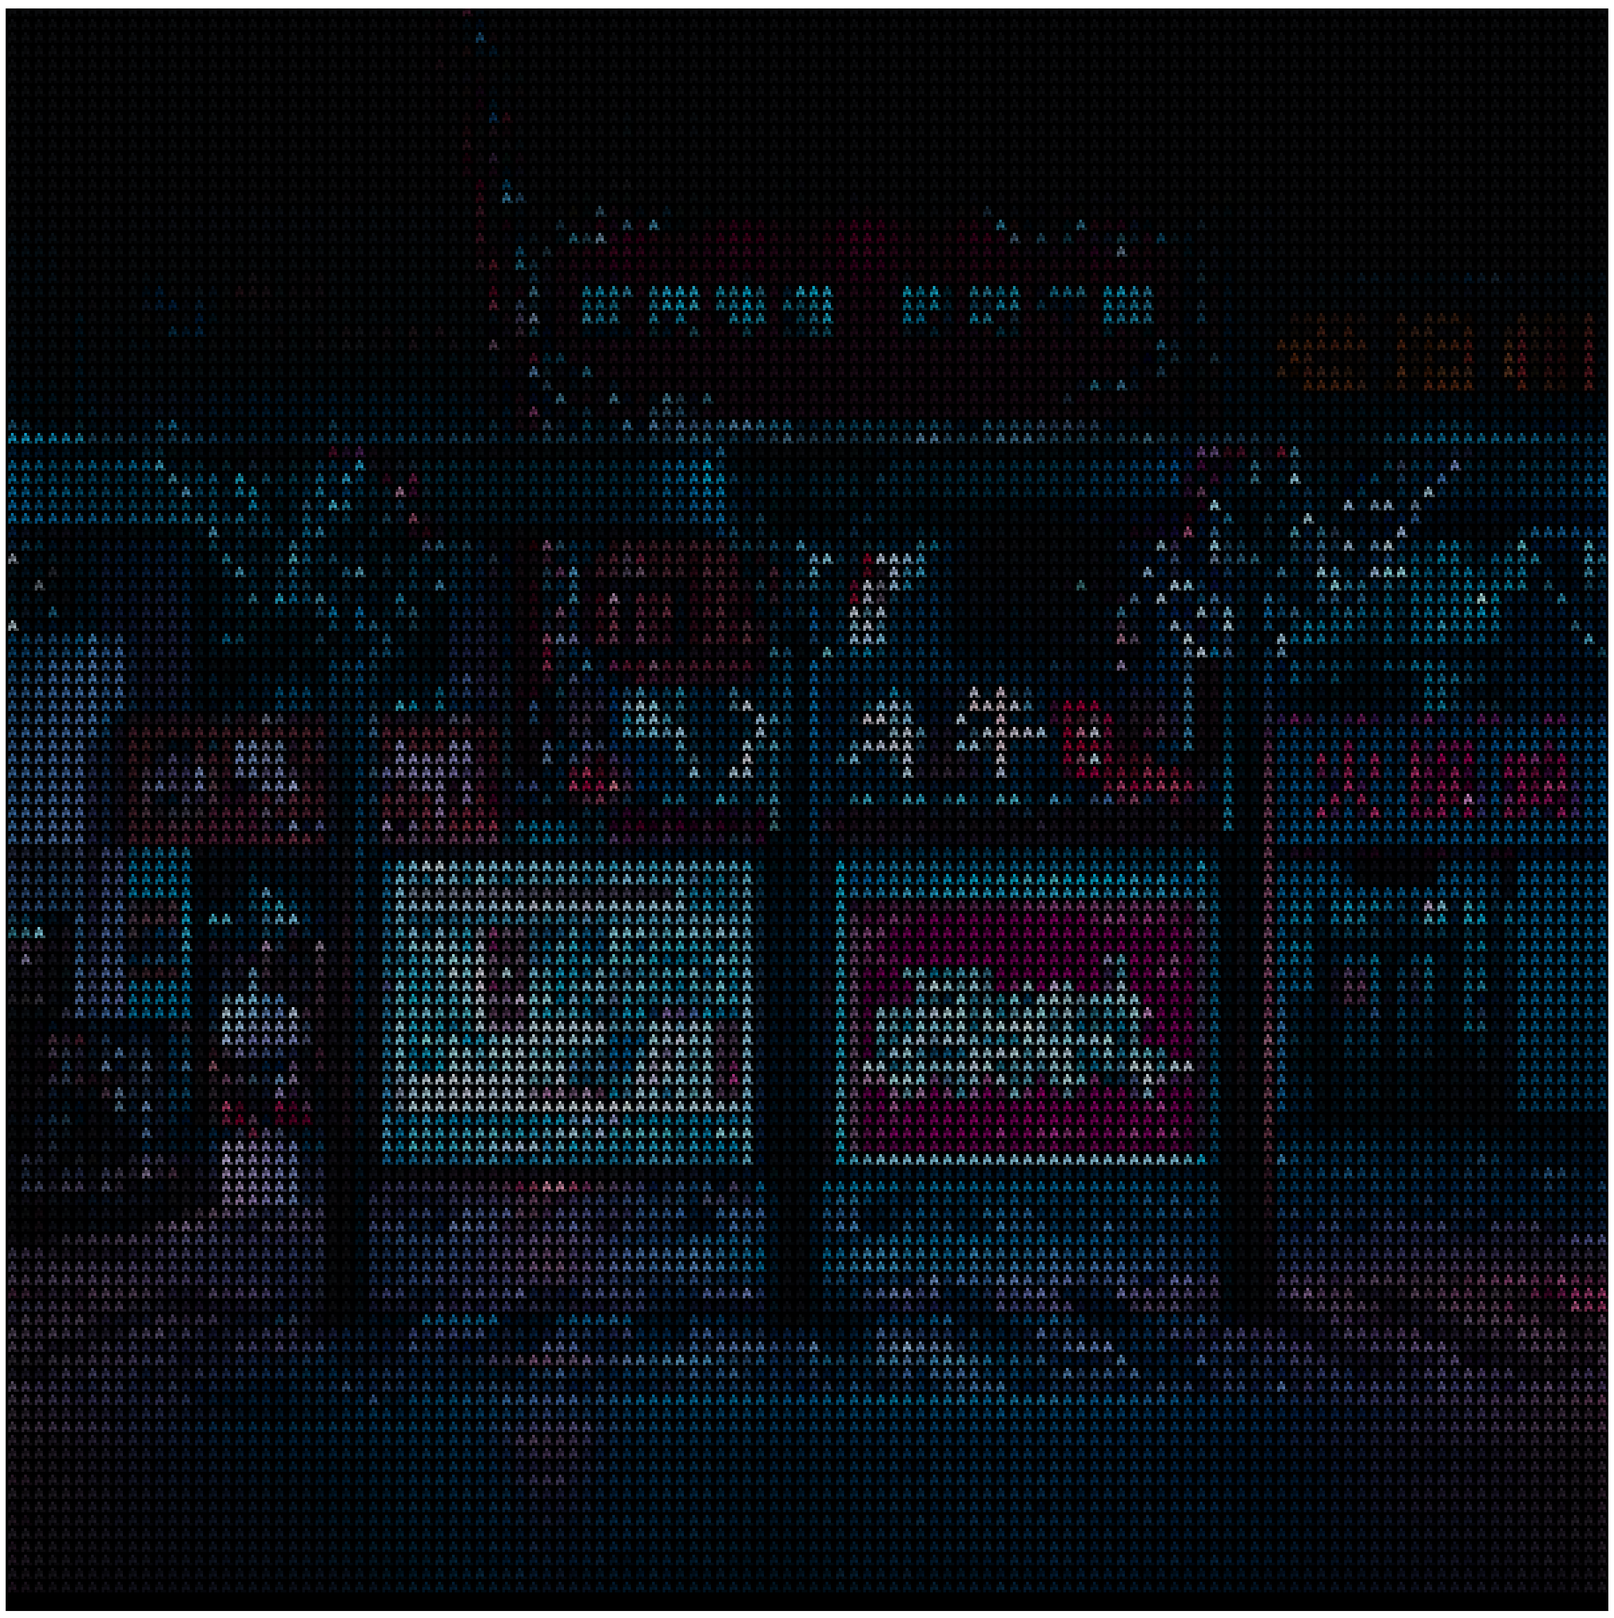


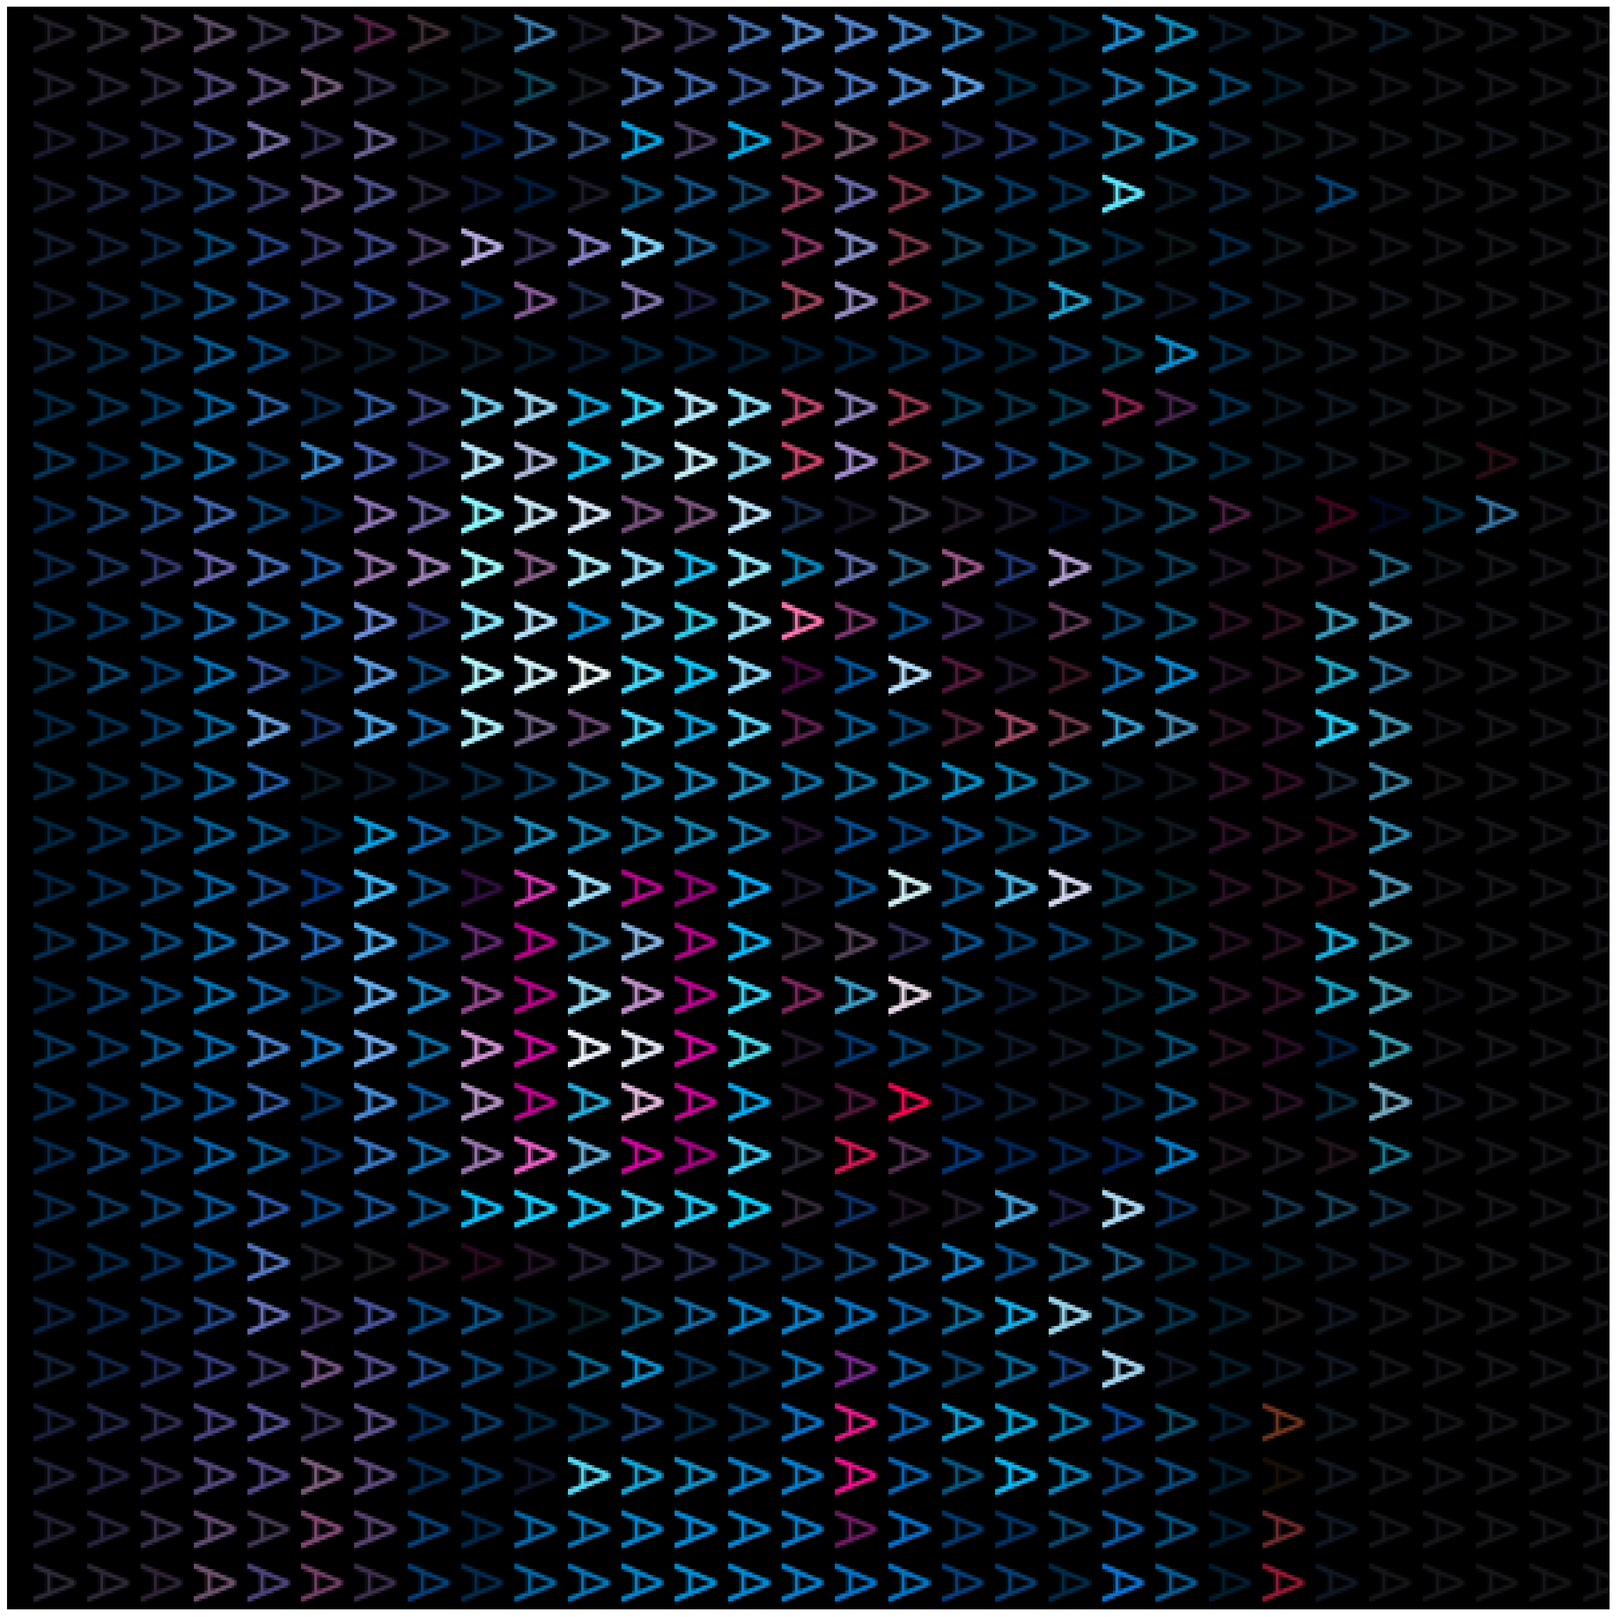


I thought about filling in the blanks, but decided against it in favor of having fun.
I would like you who are watching this to use it in the process of enjoying it.

02. Color

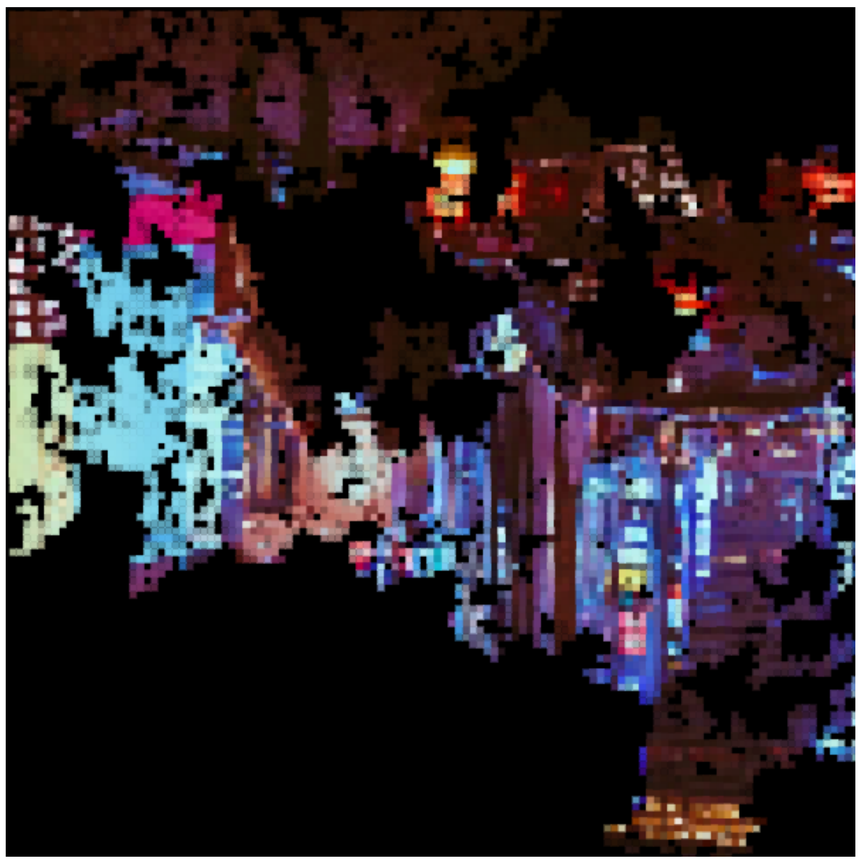
03. Text

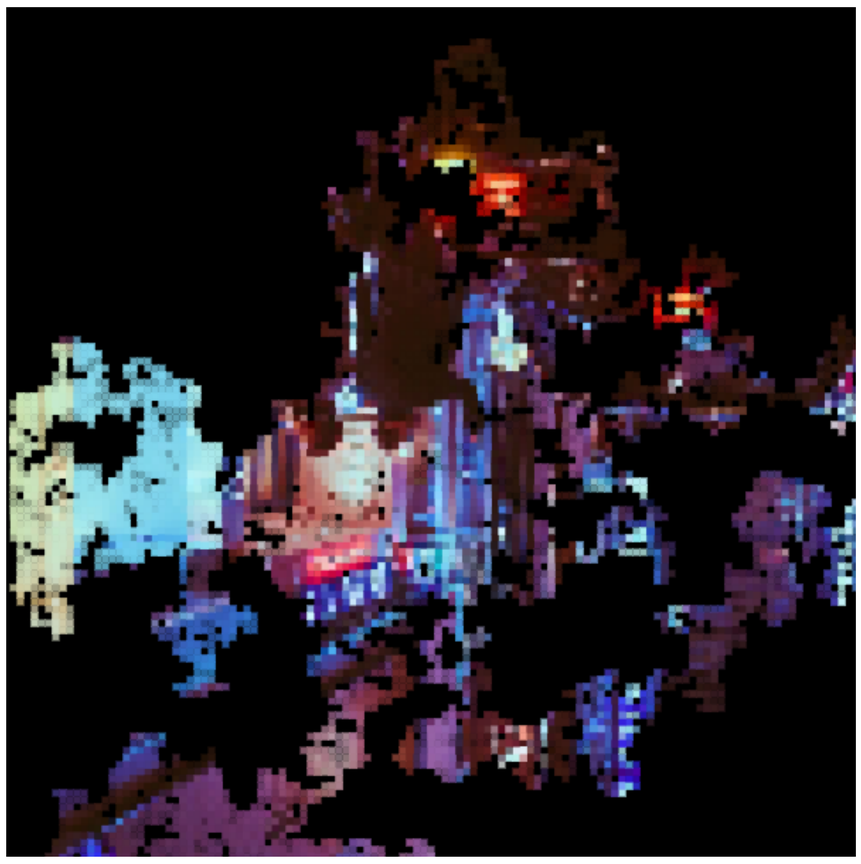


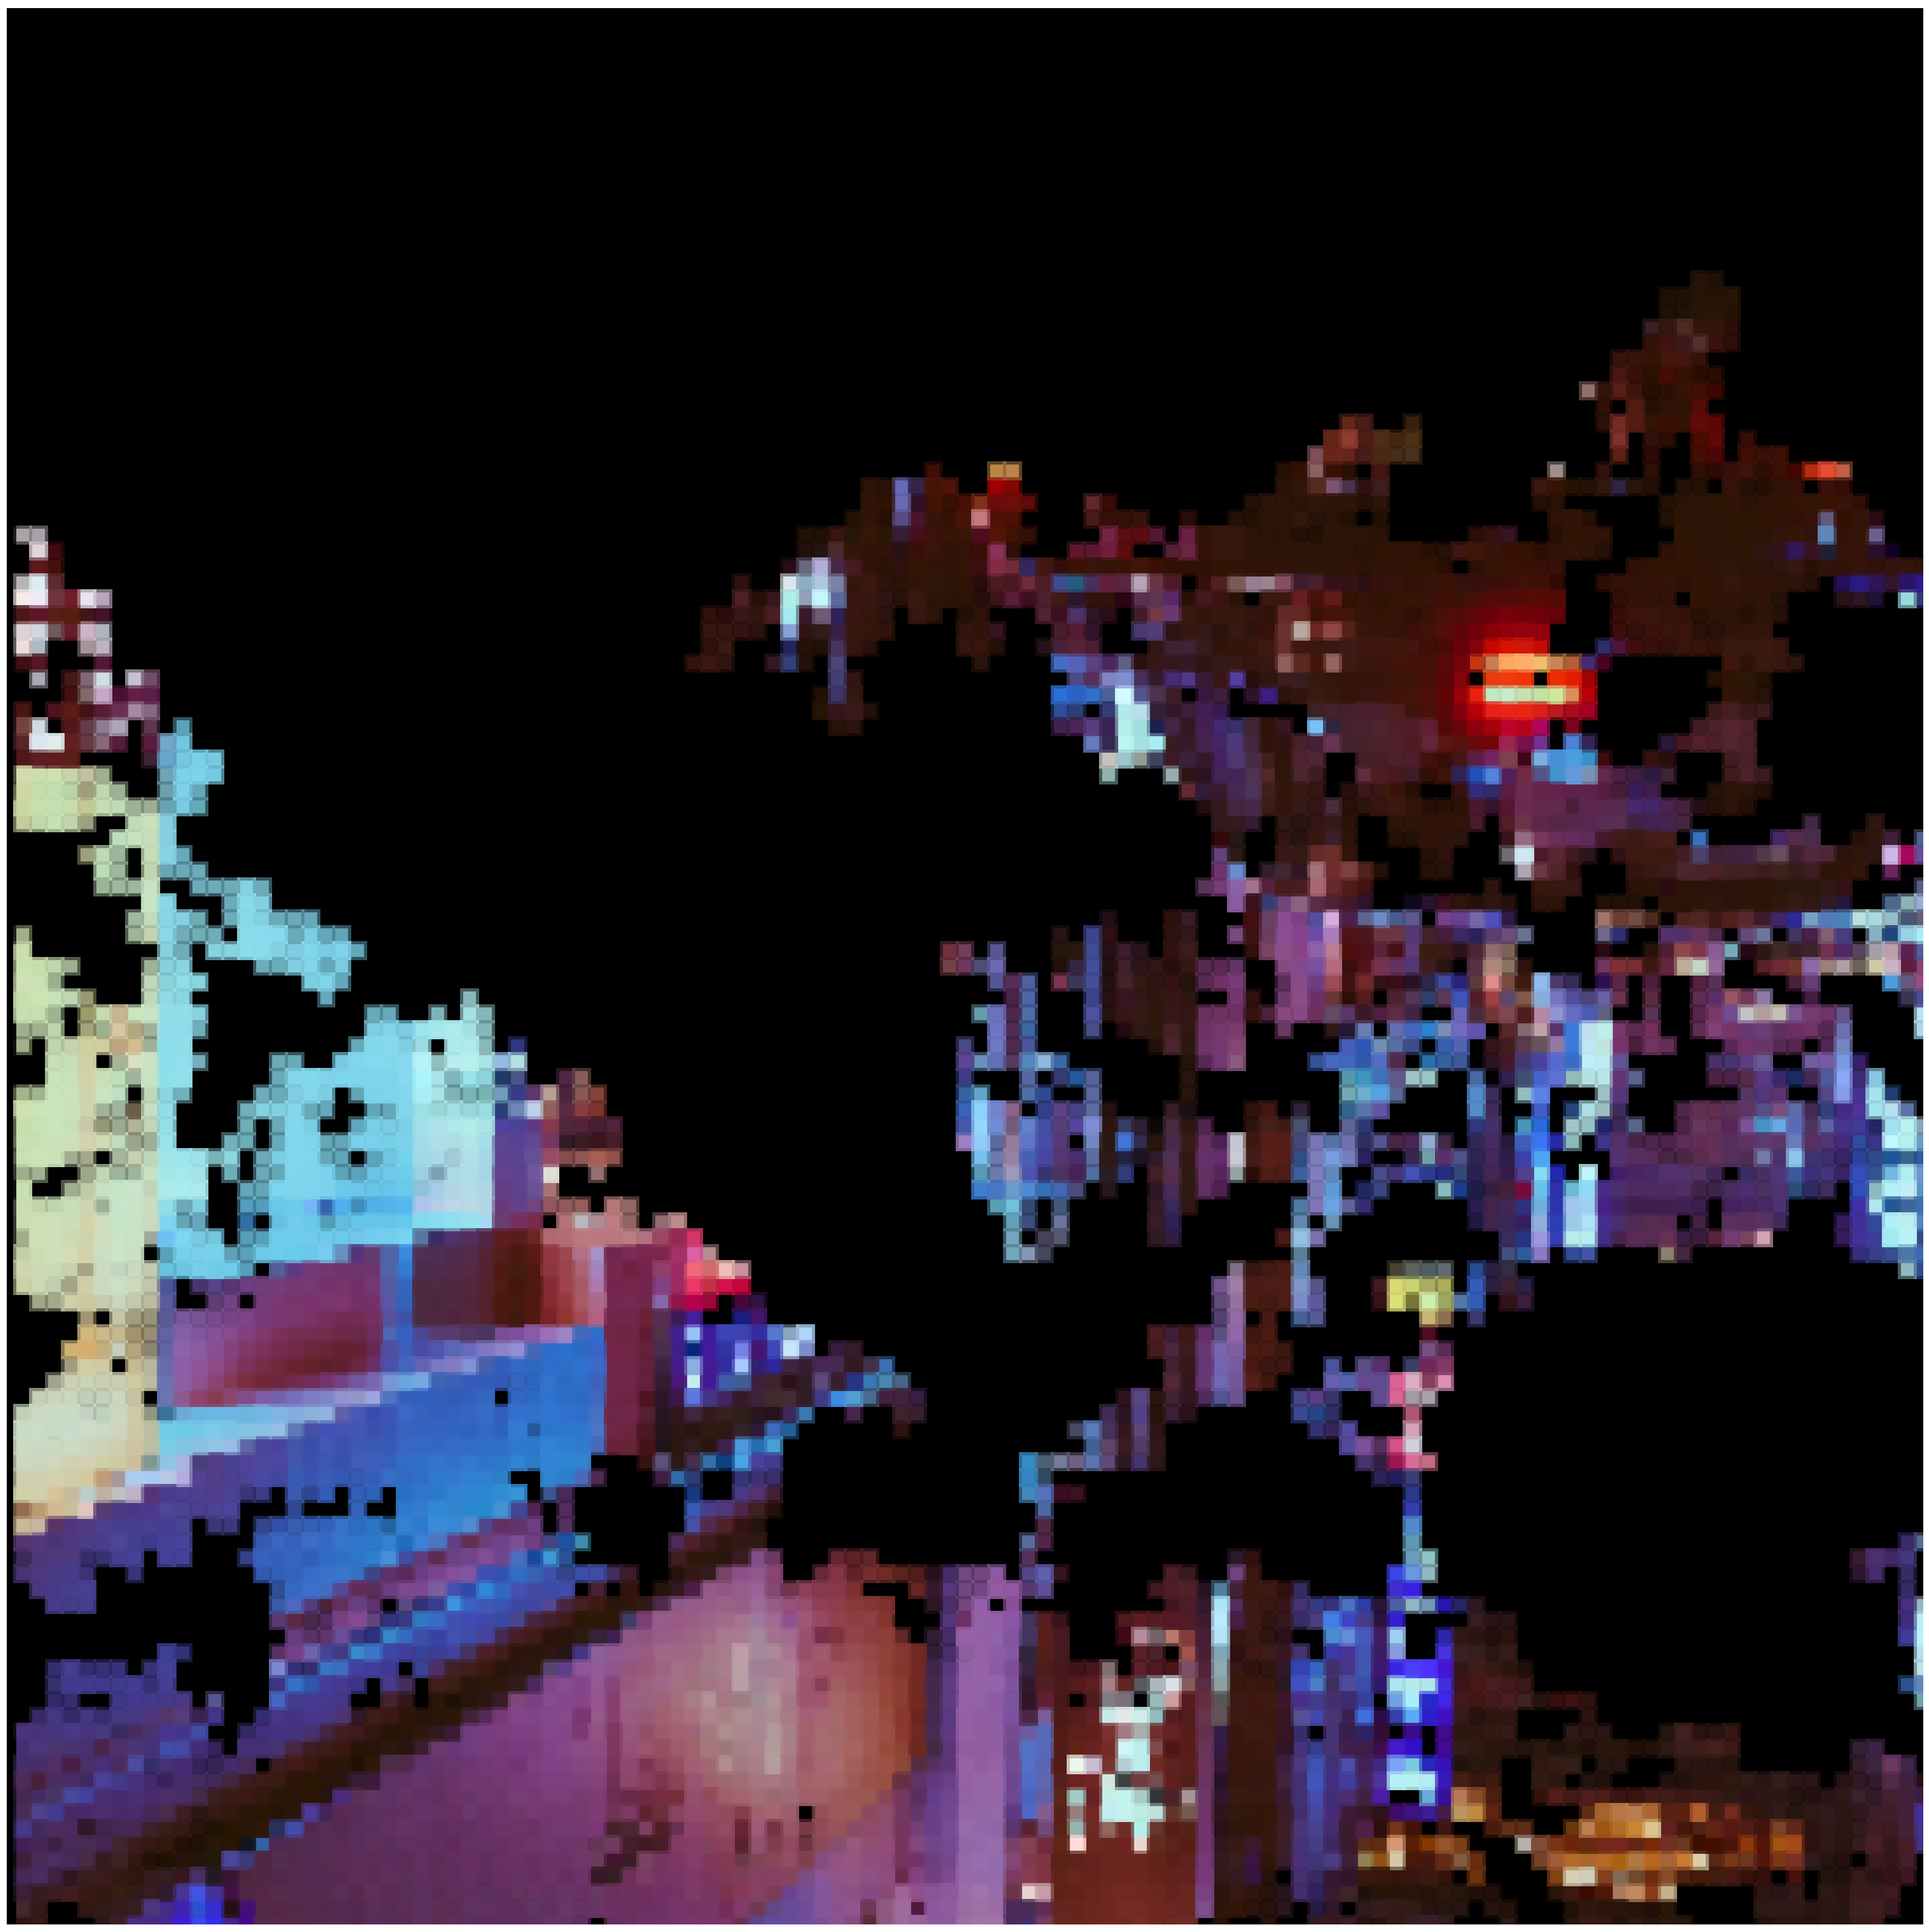


I was unsure whether to write in English or Japanese.
I chose English because I wanted as many people as possible to read it, but I'm really sorry that the English is rough because it's passed through a translator.

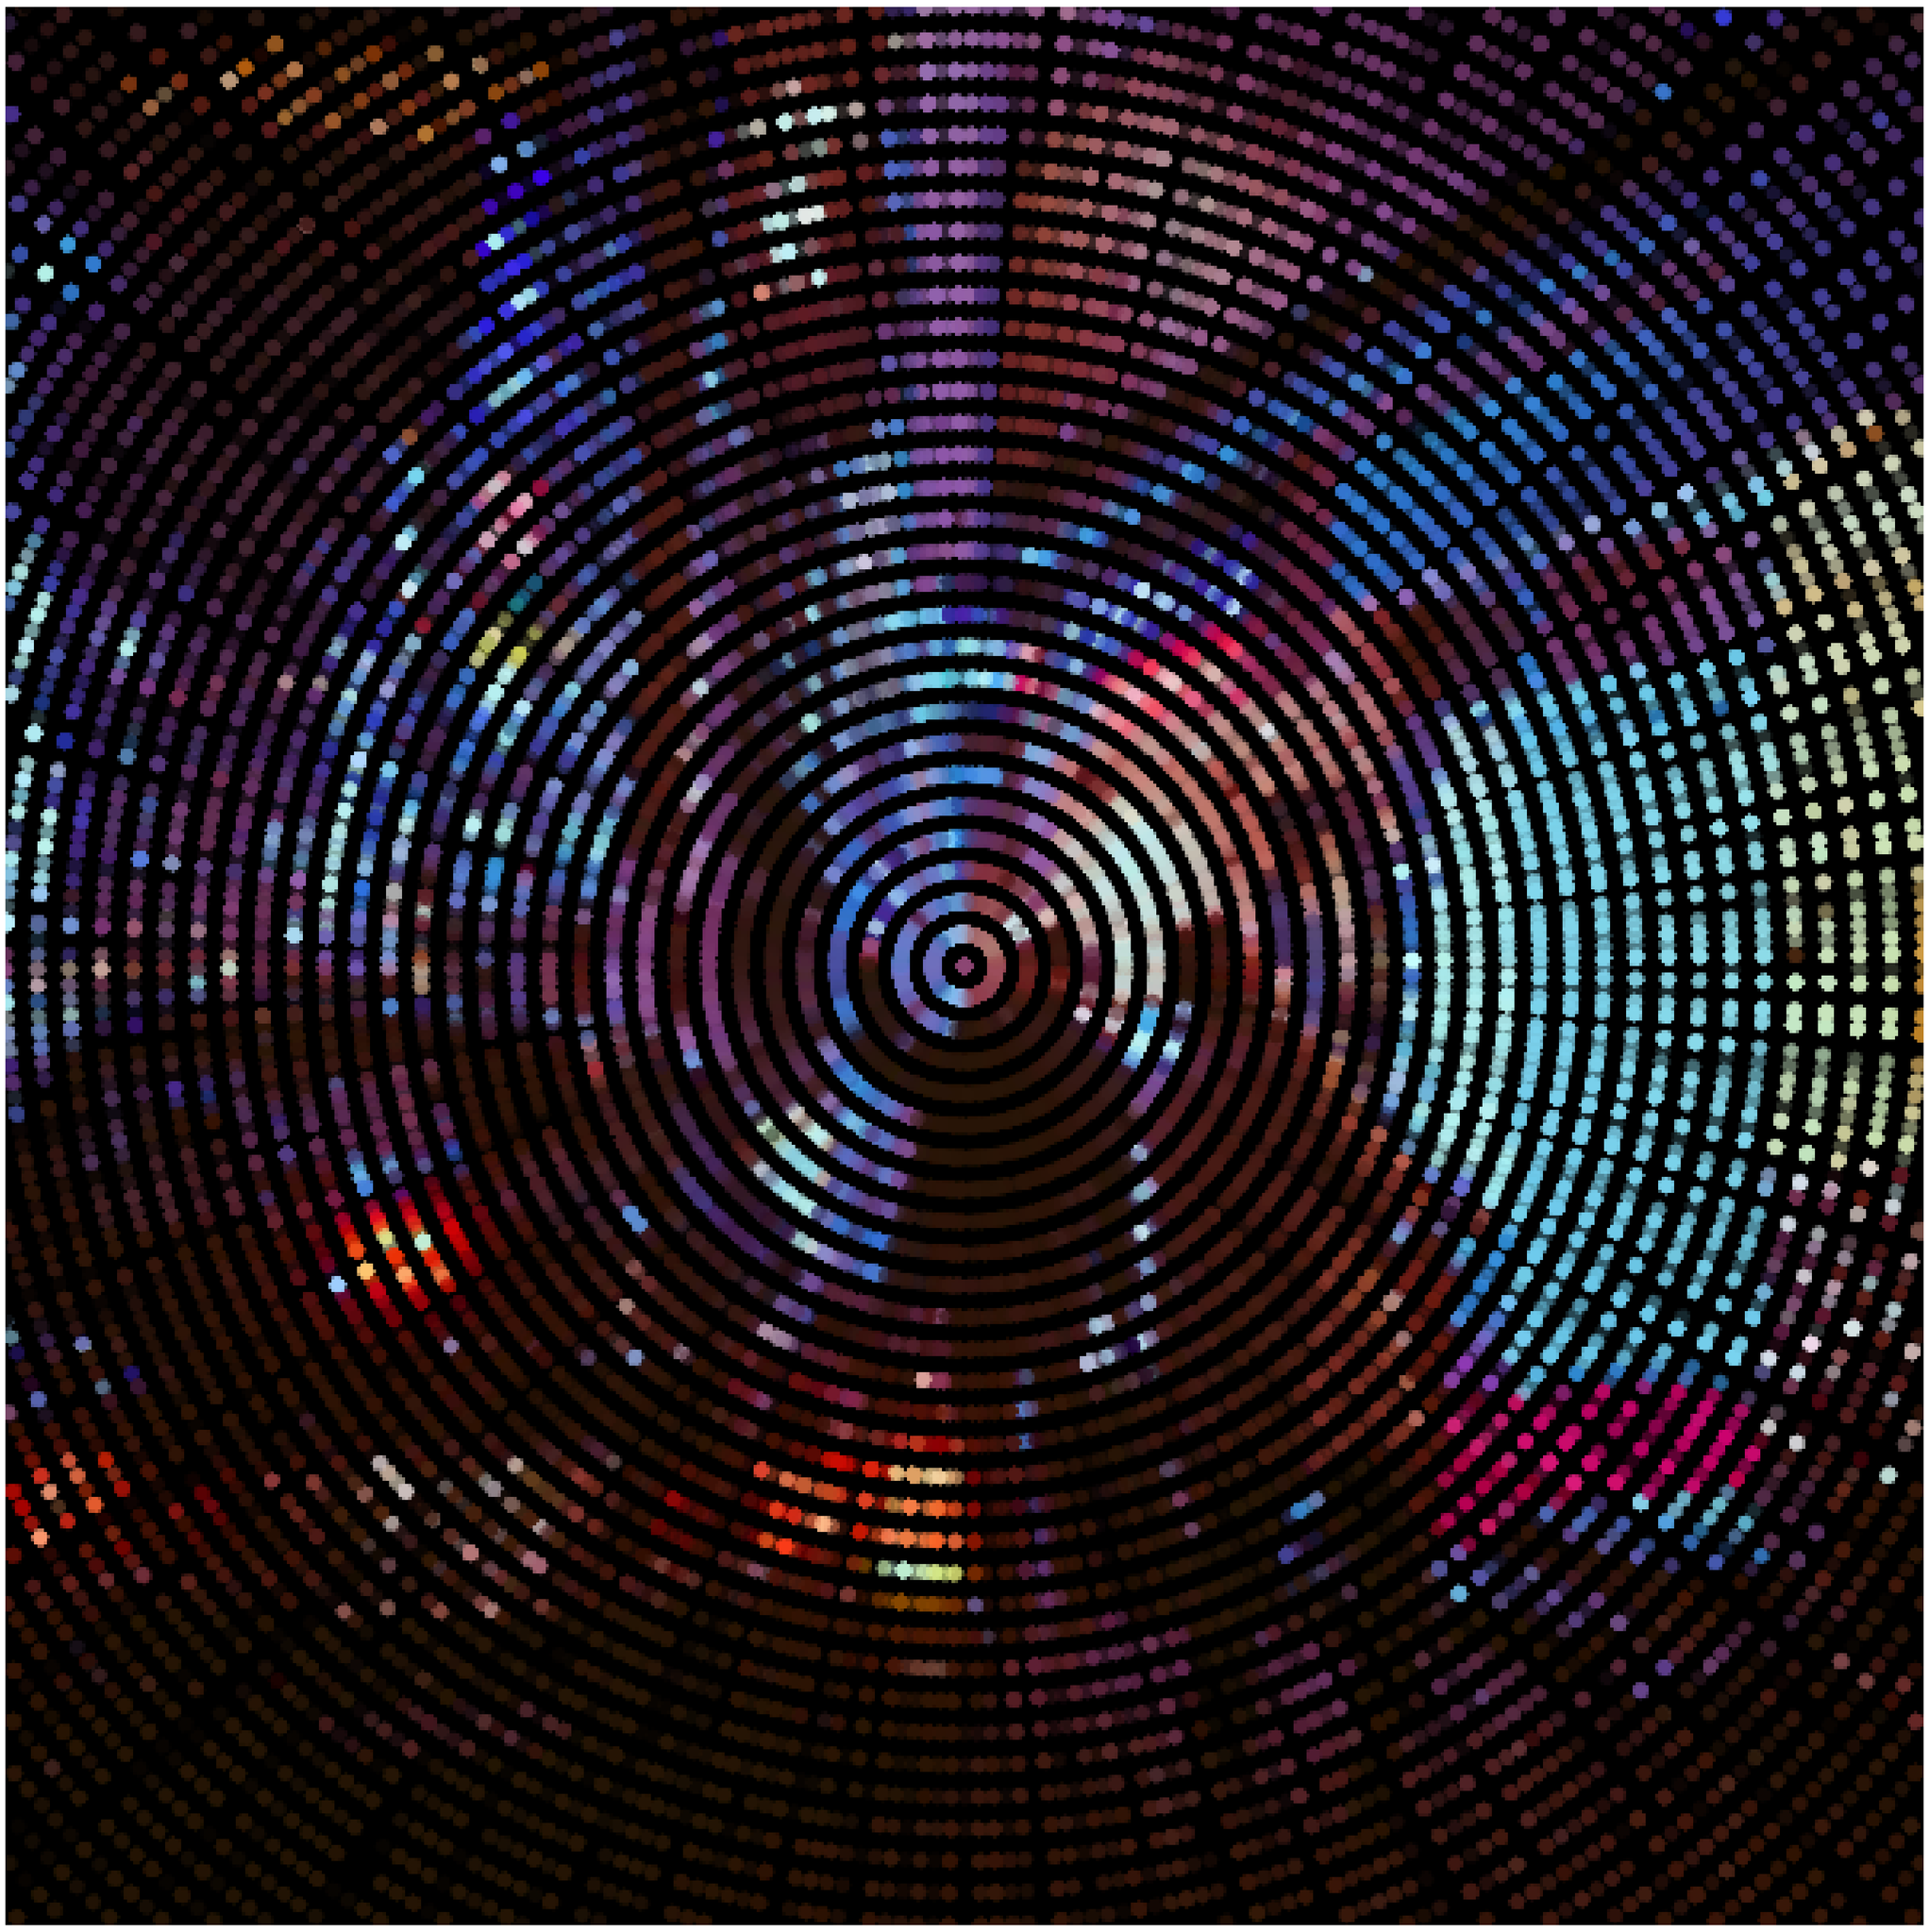
04. Particle

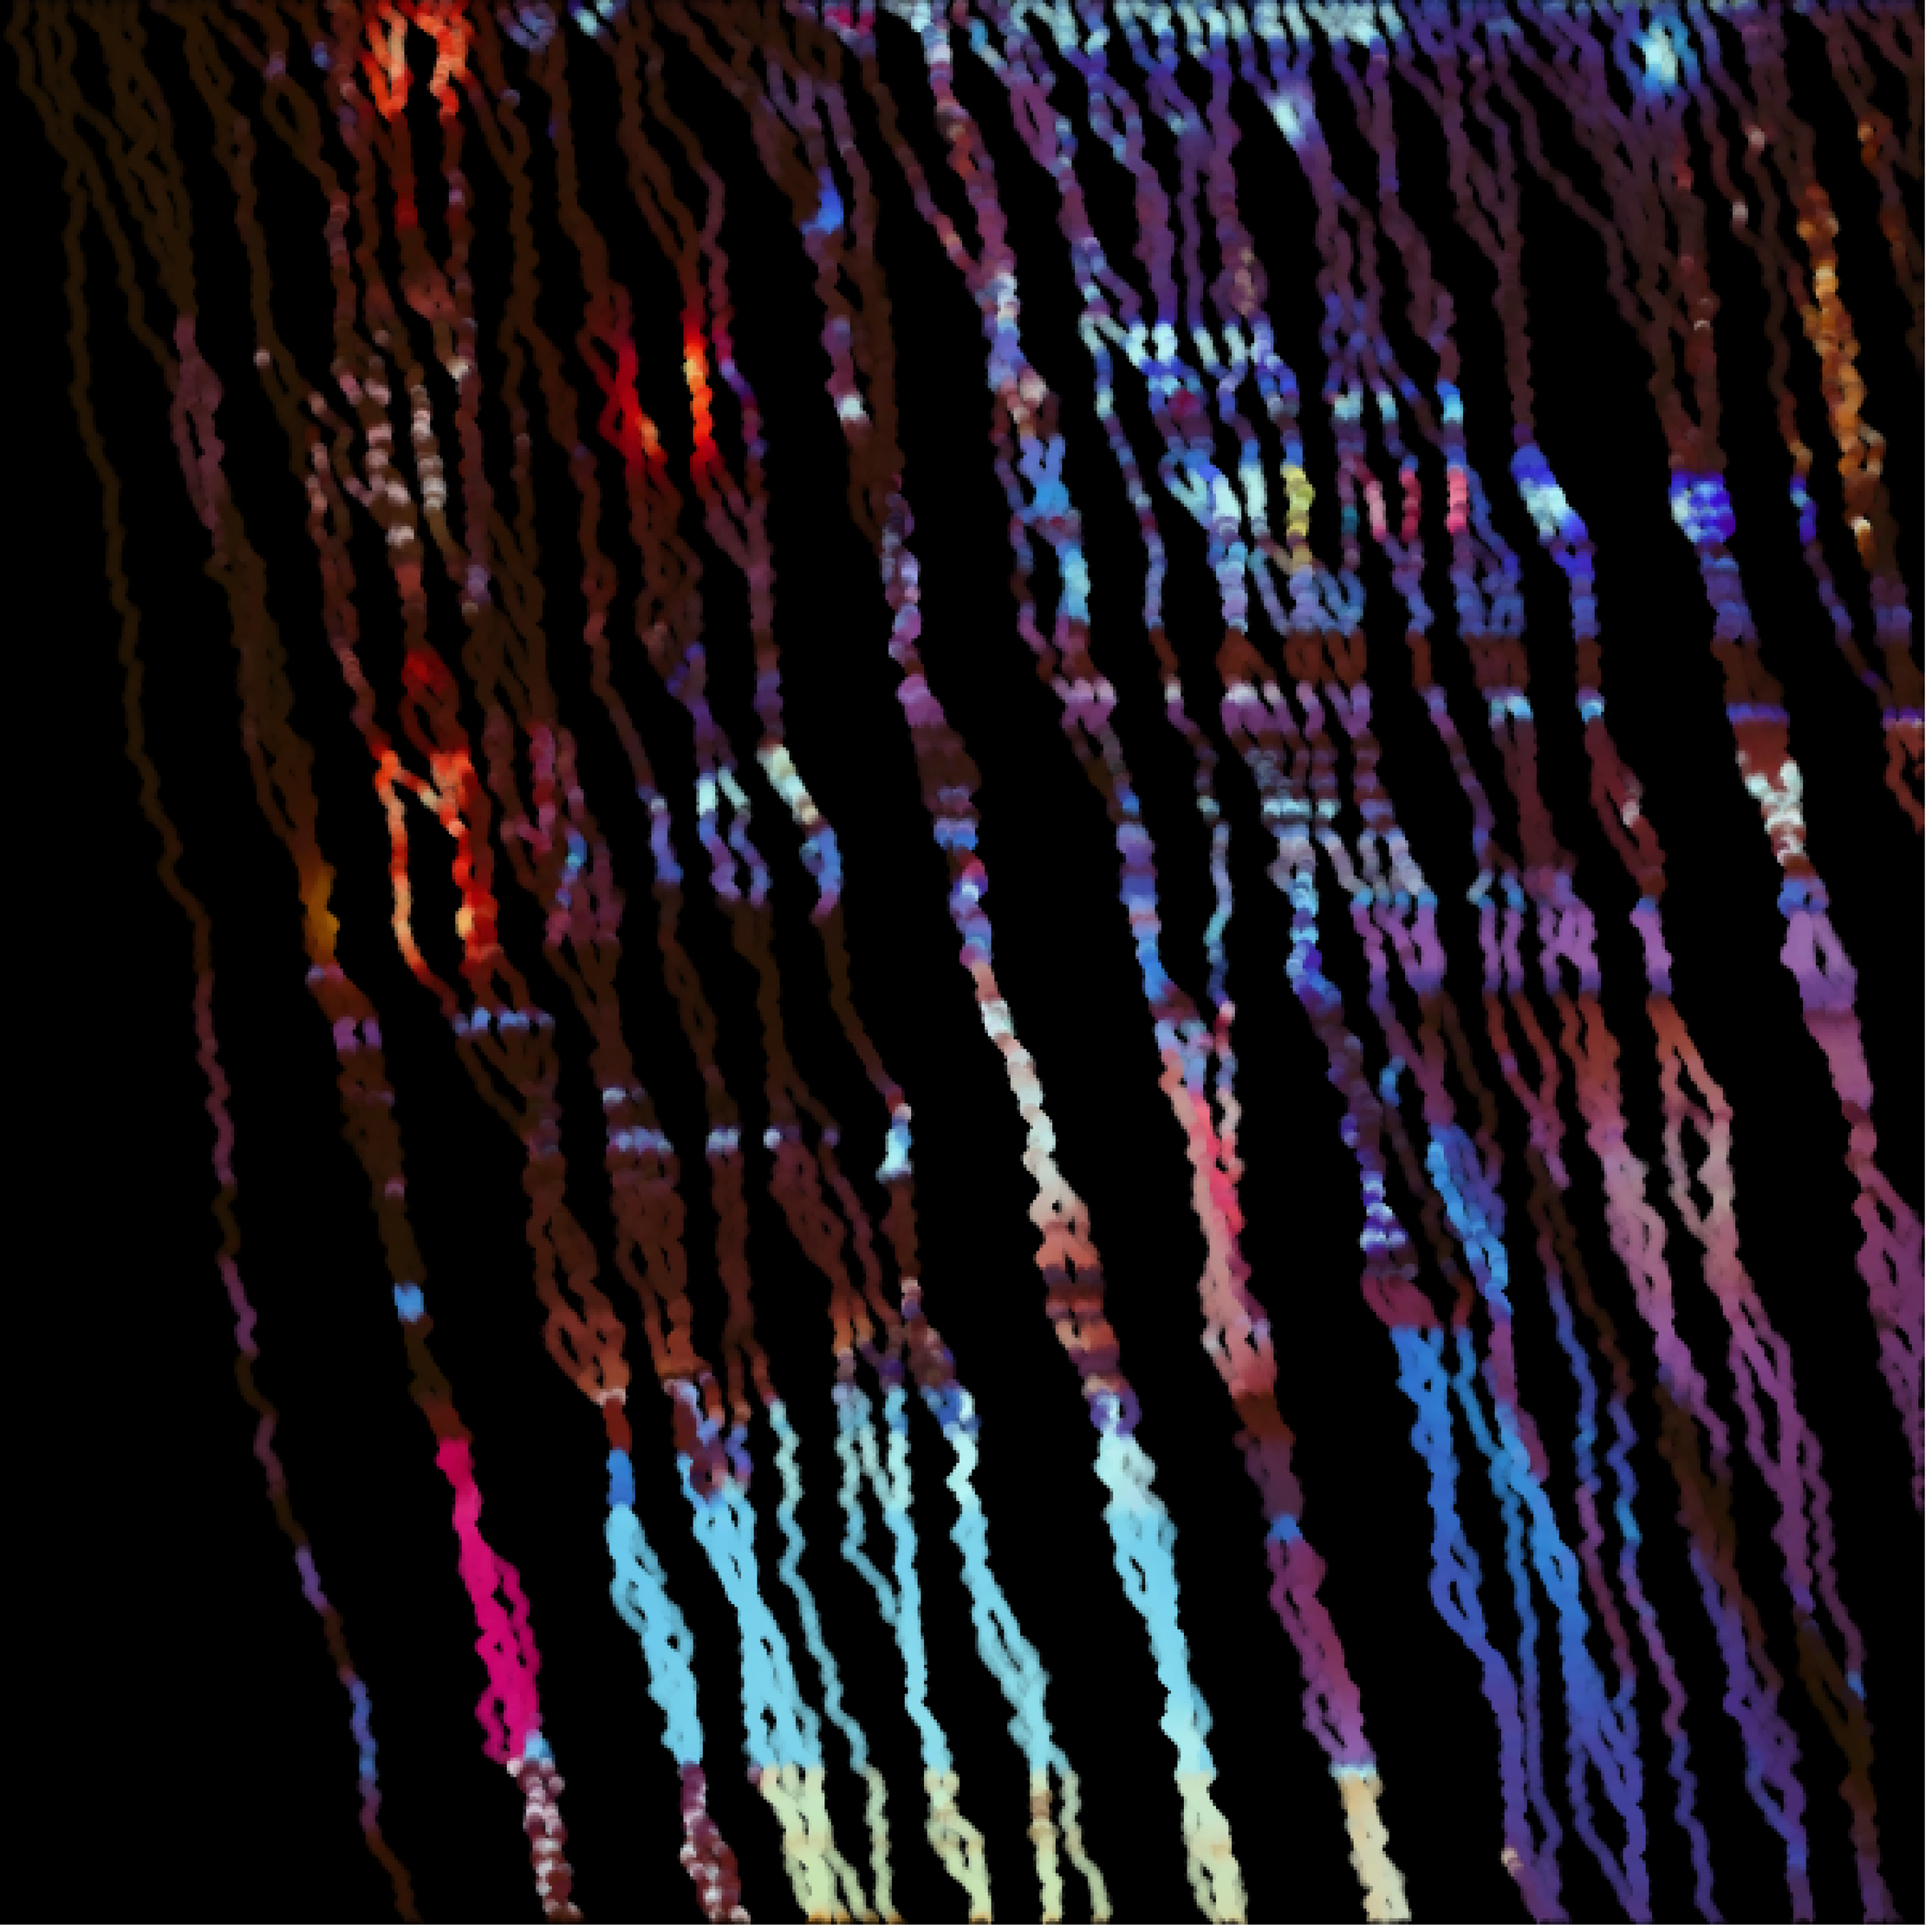


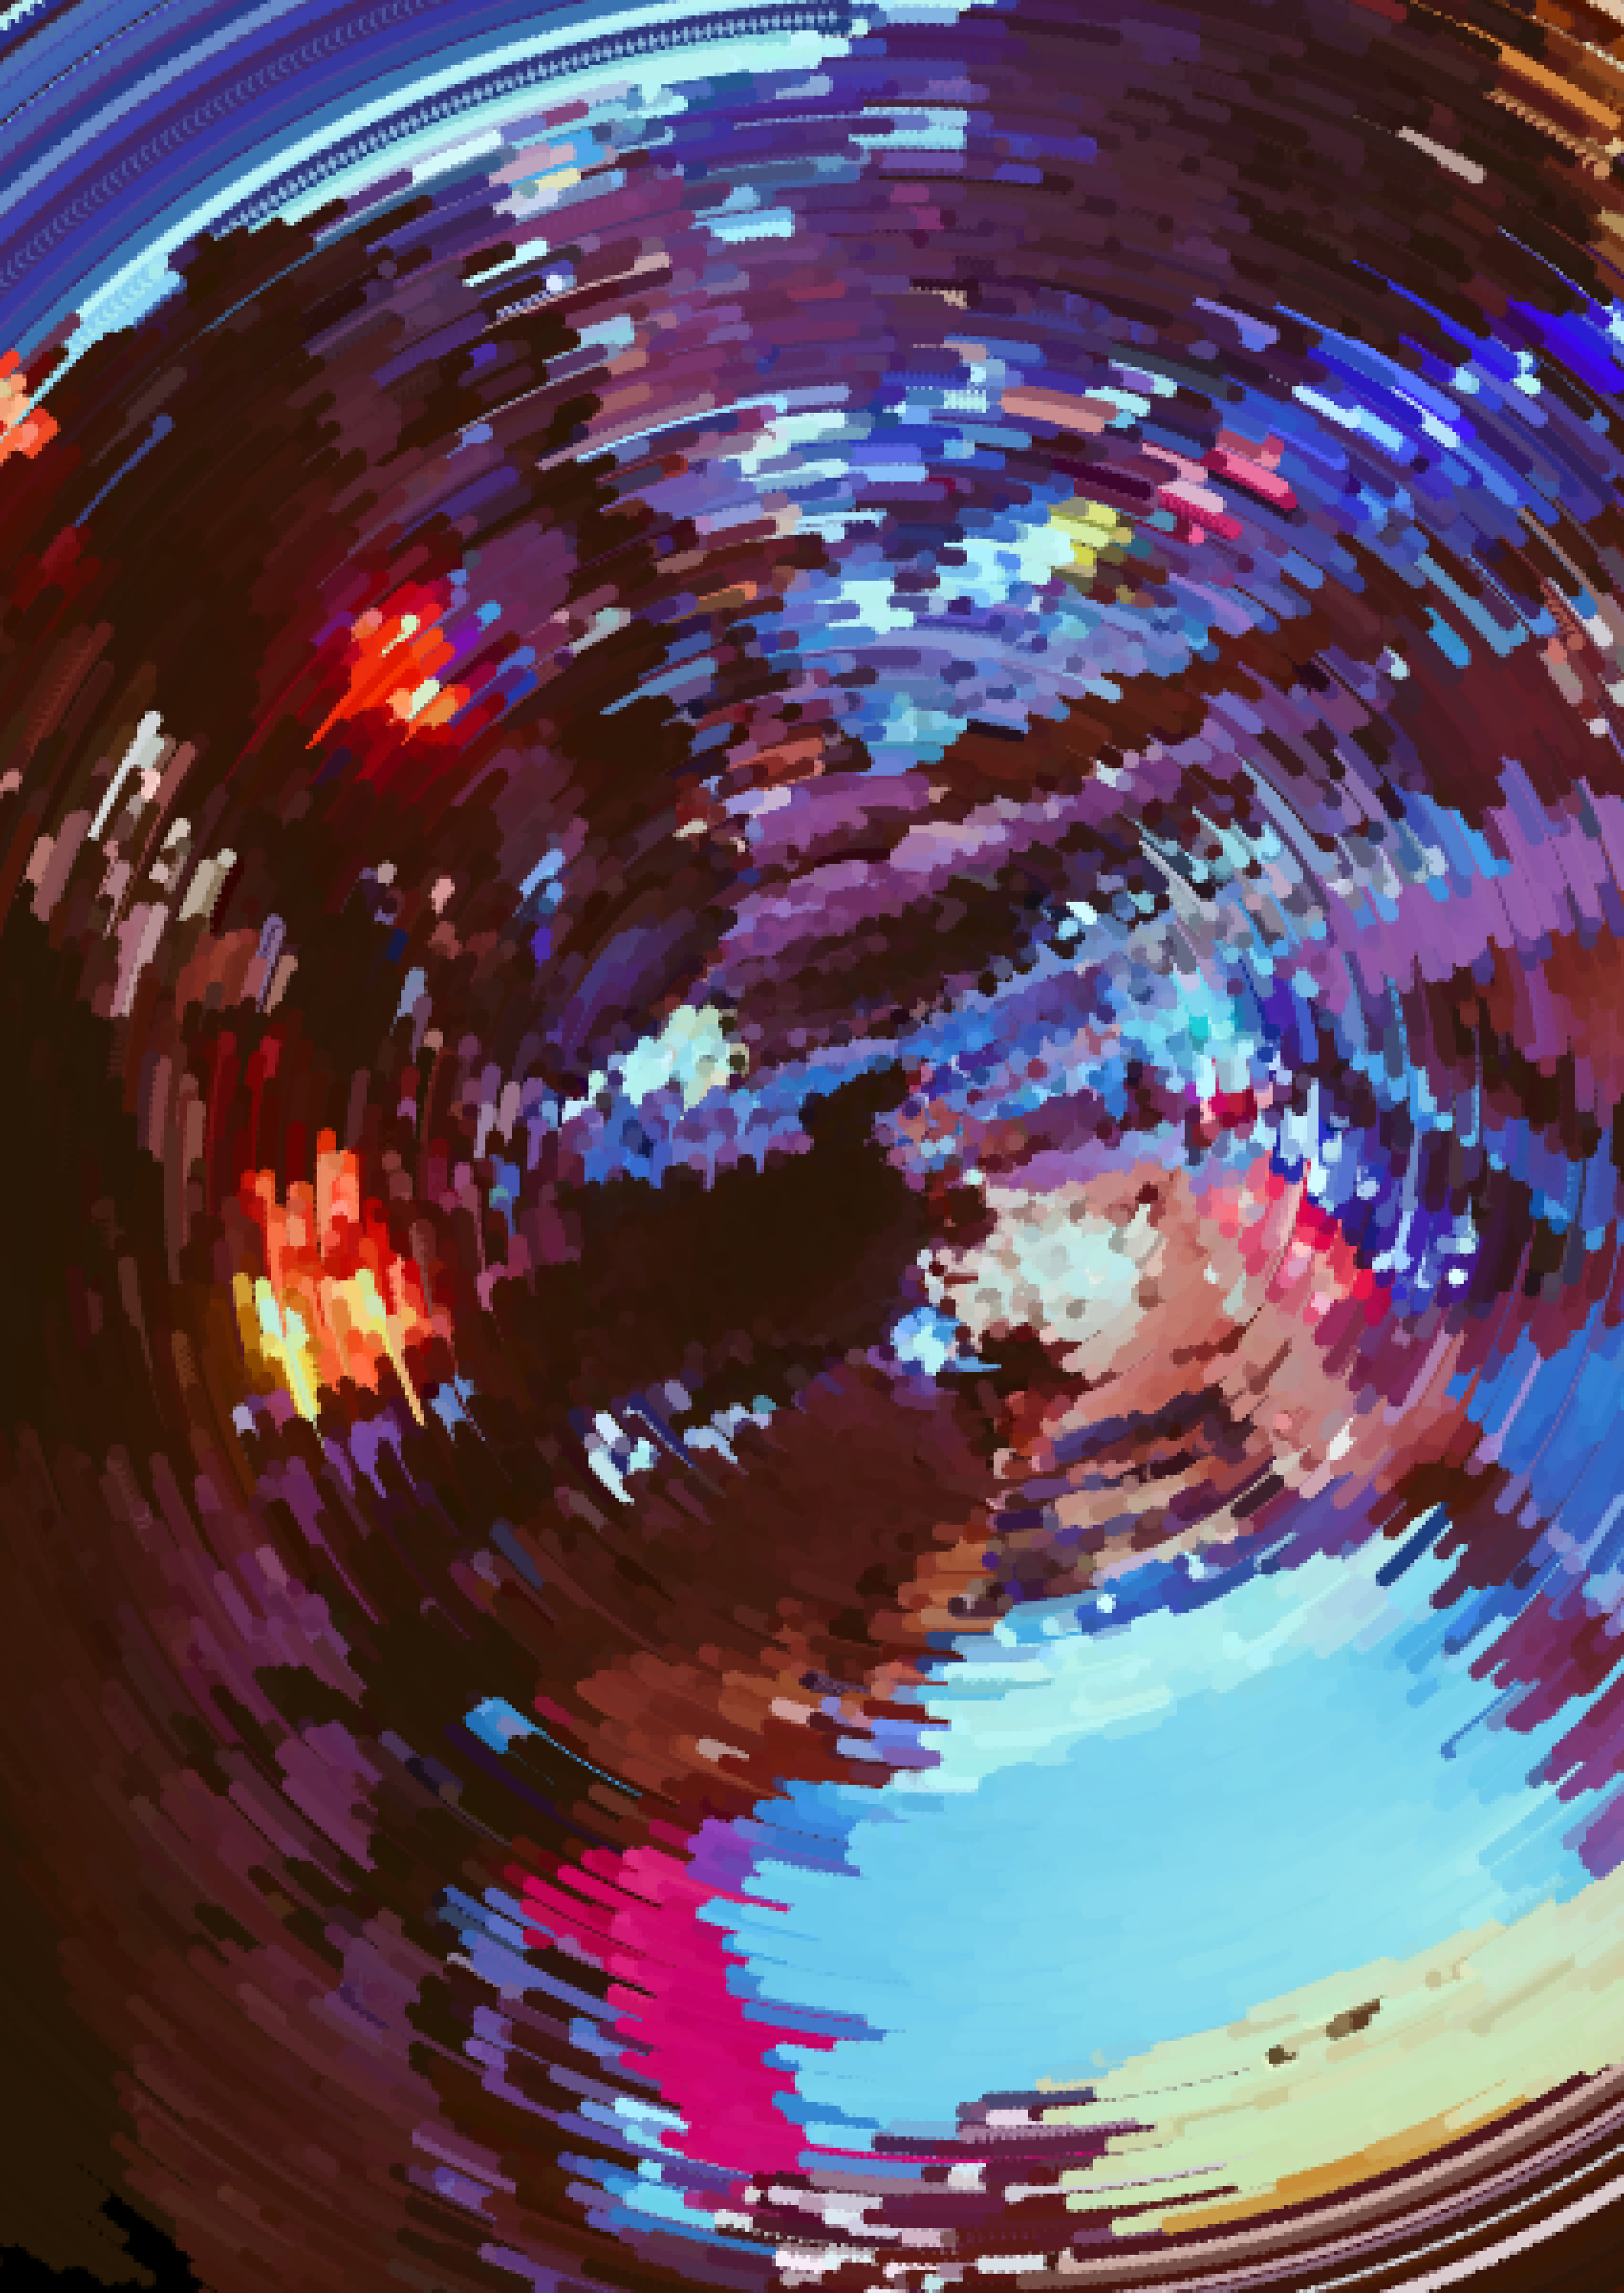




BARLETTA
23-64





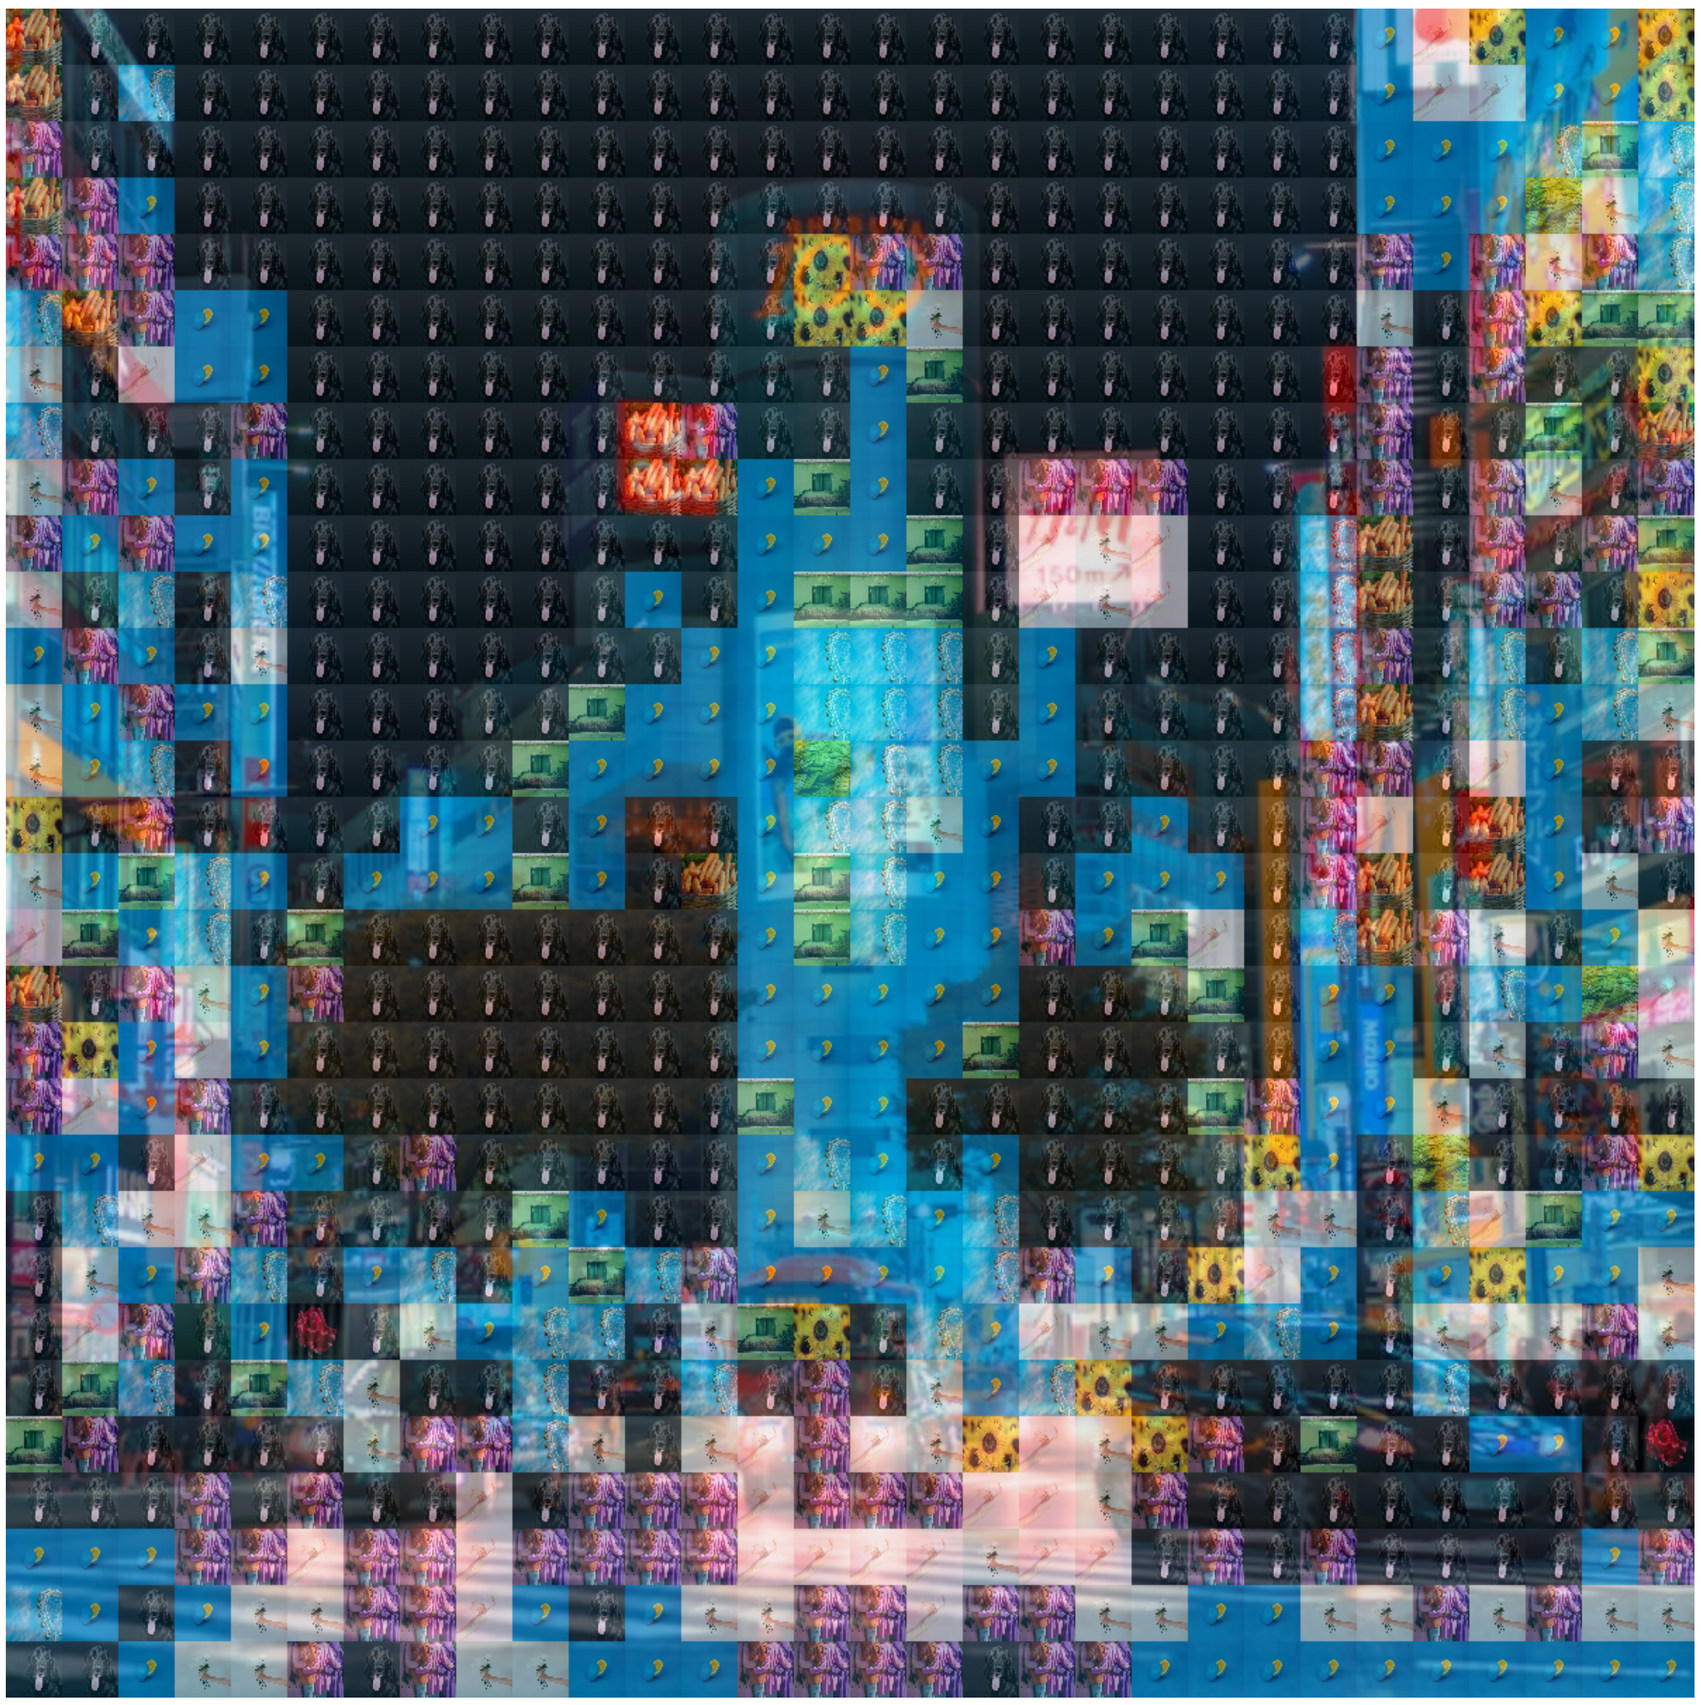


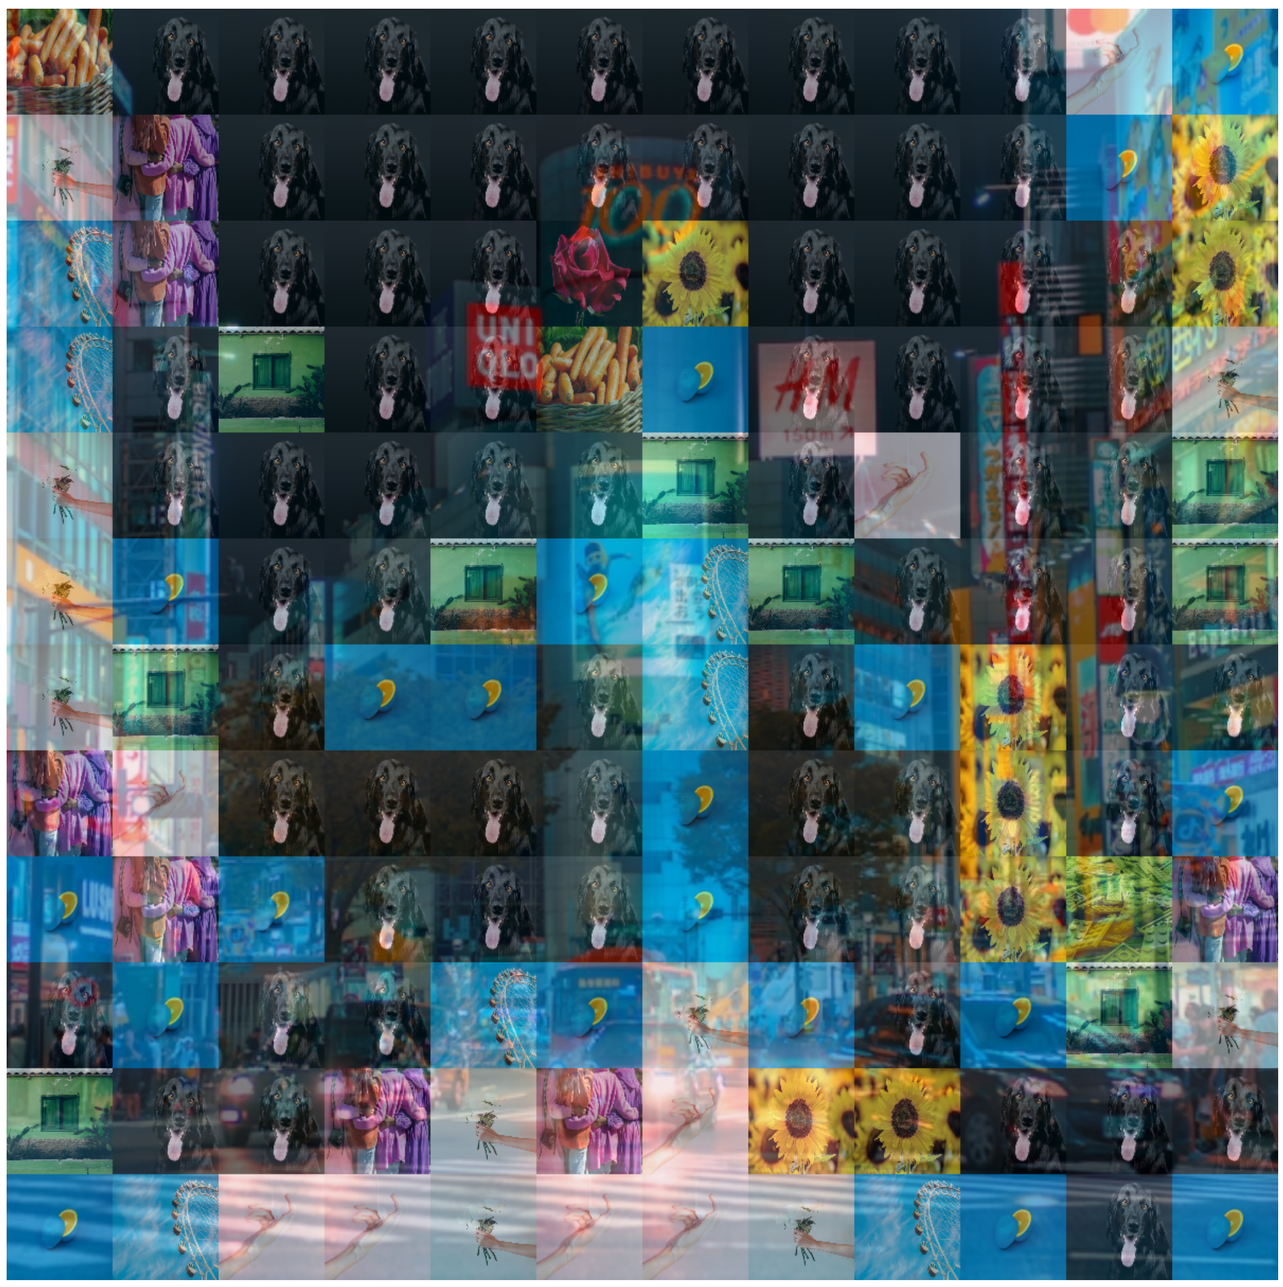
05. Mix

Rati's

06. Image

I had a little trouble arranging the images.
However, I decided to arrange it in the colorful way I wanted, so I hope you will pay attention to it.





This is just the beginning of enjoying mosaics.
Mosaics created through creative coding can be enjoyed in countless ways by changing the parameters.
Confident in its infinite possibilities, we added "β" to the title.
